

Dear Sirs,

This is to state my position to oppose LPFM (Low Power FM stations) from taking priority over current FM translator service.

The station that I currently listen to in Memphis, K-Love, which can be heard on 94.7, 94.9 and 105.3 is also a station I listen too when traveling as well. This station:

- 1) Provides useful public service announcement for free for non profit organizations and provides information that is different from our public radio station and other local stations that are of interest to me as a community member.
- 2) If K-Love were taken off the radio or overpowered by a local low power station I would loose the information and services they provide from a local and international level since my company does not allow Internet streaming of this or any station at my place of business. They also provide very family friendly and positive music.
- 3) Many of my friends and associates in the volunteer organizations I am associated with get a lot of useful information and find this station a very positive alternative to the national news, media and other secular advertising that we can get from any other station here in Memphis.

Please don't let this LPFM be allowed!

Sincerely,
Craig T. Reckord
